# (https://profile.intra.42.fr/searches) SCALE FOR PROJECT INIT (/PROJECTS/INIT)

You should correct 1 student in this team

Git repository

vogsphere@vogsphere.42.fr:intra/2018/activities/init/arizze

# Introduction

Please respect the following rules:

- Remain polite, courteous, respectful and constructive throughout the evaluation process. The well-being of the community depends on it.
- Identify with the person (or the group) graded the eventual dysfunctions of the work. Take the time to discuss and debate the problems you have identified.
- You must consider that there might be some difference in how your peers might have understood the project's instructions and the scope of its functionalities. Always keep an open mind and grade him/her as honestly as possible. The pedagogy is valid only if the peer-evaluation is conducted seriously.

# **Guidelines**

- Only grade the work that is in the student or group's GiT repository.
- Double-check that the GiT repository belongs to the student or the group. Ensure that the work is for the relevant project and also check that "git clone" is used in an empty folder.
- Check carefully that no malicious aliases was used to fool you and make you evaluate something other than the content of the

official repository.

- To avoid any surprises, carefully check that both the evaluator and the evaluated students have reviewed the possible scripts used to facilitate the grading.
- If the evaluated student has not completed that particular project yet, it is mandatory for this student to read the entire subject prior to starting the defence.
- Use the flags available on this scale to signal an empty repository, non-functioning program, a norm error, cheating etc. In these cases, the grading is over and the final grade is 0 (or -42 in case of cheating). However, with the exception of cheating, you are encouraged to continue to discuss your work (even if you have not finished it) in order to identify any issues that may have caused this failure and avoid repeating the same mistake in the future.

# Follow Slash 16 around the world

You have to follow us in the whole world

The student has followed Slash 16 on Linkedin, Facebook and Twitter

The student has followed Slash 16 on Linkedin, Facebook and Twitter

 $\times$ No

# Part 2 - Network

Evaluation of Part 2 - Network

Get the list of the network interfaces of the machine without displaying any detail

Check that the answer file contains the command which lists the names of the interfaces of the machine and no other information. For instance:

\$>`cat 01`
lo0 gif0 stf0 en0 en1 en2 en3 p2p0 awdl0 bridge0
\$>

✓ Yes

 $\times$ No

## Identify the IP address of the Ethernet interface

Check that the answer file contains the command which identifies and displays the specifications of the Ethernet interface. For instance:

\$>`cat 02`
en0: flags=XXXX
mtu 1500
options=10b
ether 00:00:00:00:00
inet 42.42.42.42 netmask 0xffffff00 broadcast 42.42.42.255
nd6 options=1
media: autoselect (1000baseT)
status: active
\$>

# Identify the MAC address of the Wi-Fi card

Check that the answer file contains the command which identifies and diplays the MAC address of the wi-fi board. For instance:

\$>`cat 03` xxn: flags=XXXX ether 00:00:00:00:00:00 \$>

ideniiny ine deidon gu	leway in the rooming rable		
	contains the command which default gateway in the routing t	able. For instance:	
\$>sh 04 default 42.42.42.42 UGSd \$>	: 19 16 en0		
	✓ Yes	XNo	
Identify the IP address	of the DNS server which a	nswers to slash16.org	
	contains the command which P address of the DNS server. F	or instance:	
\$>`cat 05` Server:10.51.1.42 Address:10.51.1.42			
Non-authoritative answer: Name:slash16.org Address: 195.154.52.157 Name:slash16.org Address: 195.154.52.158 \$>			
	✓ Yes	×N₀	
Get the complete path o	of the file that contains the	IP address of the DNS server you're using	
	contains the complete path of the used DNS server is written.	he file in	
\$>cat 05 /etc/resolv.conf \$>			
	✓ Yes	×No	

use another DNS server to solve the same domain name.	For instance:
\$>`cat 07`	
Server:8.8.8.8	
Address: 8.8.8.8	
Non-authoritative answer:	
Name:slash 16.org	
Address: 195.154.52.157	
Name:slash 16.org	
Address: 195.154.52.158	
<b>\$&gt;</b>	
✓ Yes	×N₀
Find the provider of slash 16.org  Check that student's answer in the file is AWS (Amazon W.)	/eb Services).
∀Yes	×No
Find the external IP of 42.fr	
Check that student's answer in the file is 163.172.250.12	and/or 163.172.250.11.
	×No
Identify the network devices between your comp	uter and the slash 16.org domain
Check that the answer file contains the command which identifies and displays the different network devices betwee your computer and slash 16.org.	een

\$>`cat 10`

For instance:

traceroute to slash 16.org (195.154.52.158), 64 hops max, 52 byte packets

1 10.8.0.1 (10.8.0.1) 5.809 ms 6.087 ms 3.124 ms

Check that the answer file contains the command which

2 10.42.1.254 (10.42.1.254) 6.005 ms 13.668 ms 7.037 ms

3 nat-1.42.fr (10.60.1.11) 7.530 ms 3.379 ms 9.966 ms

4 dc3.42.fr (62.210.35.1) 7.100 ms 7.587 ms 5.160 ms 5 195.154.1.174 (195.154.1.174) 57.350 ms 168.093 ms 8.906 6 a9k2-45x-s44-2.dc3.poneytelecom.eu (195.154.1.106) 6.59 7 195.154.1.179 (195.154.1.179) 4.077 ms 46.904 ms 3.883 s 8 pub-1.slash16.org (195.154.52.158) 5.699 ms 6.034 ms 7.63 \$>	PO ms 3.910 ms 5.525 ms ms
	XNo
Use the output of the previous command to find the nammakes the link between you (local network) and the out	
Check that student's answer in the file is the NAT server.	
	×No
Check that the server with the 10.51.1.253 IP address is	reachable from your computer.
Check that the answer file contains the command which displays if the IP address is reachable or not. For instance:	
\$>`cat 12` 64 bytes from 10.51.1.253: icmp_seq=0 ttl=62 time=40.663 ms 64 bytes from 10.51.1.253: icmp_seq=1 ttl=62 time=5.024 ms \$>	
	XNo
Figure out the server type.	
Check that student's answer in the file is DHCP.	
	imesNo
Use the Reverse DNS to find out the name of the server l	linked to the 10.51.1.81 IP address
Check that student's answer in the file is Idap-proxy.42.fr	

 $\oslash$  Yes

 $\times_{\mathsf{No}}$ 

What file contains the local DNS entries?	
Check that student's answer in the file is /etc/hosts.	
	$\times$ No
Make the 46.19.122.85 address reroute to intra.42.fr	
Check that student's answer in the file is '46.19.122.85 intra.42.fr'.	
⊗ Yes	×No
Part 3 - System  Evaluation of Part 3 - System	
In what file can you find the installed version of your Deb	oian?
Check that student's answer in the file is /etc/debian_version.	
	×No
What command can you use to rename your system?	
Check that the answer file contains the command which rename the system. For instance:	
\$>`cat 02` machine.old.name.local \$>	
⊗ Yes	×No
What file has to be modified to make it permanent?	

Check that student's answer in the file is /etc/hostname.

## What command gives your system was last booted?

Check that the answer file contains the command which gives the time since the last boot of the system. For instance:

\$>`cat 04` 17:44 up 1 day, 6:45, 4 users, load averages: 1.33 1.42 1.40 \$>

√ Yes

 $\times$ No

#### Name the command that determines the state of the SSH service?

Check that the answer file contains the command which determines the state of the SSH service. For instance with init.d:

\$>`cat 05`
openssh-daemon (pid 22405) is running...
\$>

Or with service:

> cat 05

• ssh.service - OpenBSD Secure Shell server

Loaded: loaded (/lib/systemd/system/ssh.service; enabled)

Active: active (running) since Fri 2016-12-02 18:42:05 CET; 1 months 0 days ago

Main PID: 13106 (sshd)

CGroup: /system.slice/ssh.service

— 2461 ssh-agent -s

-13106 /usr/sbin/sshd -D

—27517 sshd: skyline [priv]

—27519 sshd: skyline@pts/0

---27520 -zsh

—27561 sudo su

—27562 su

—27563 zsh

27589 systemctl status sshd.service

\$>

#### Name the command that reboots it.

Check that the answer file contains the command which reboot the SSH service. For instance with init.d:

\$>`cat 06`

Stopping sshd: [ OK ] Starting sshd: [ OK ]

\$>

Or with service:

\$>`cat 06`

\$> service sshd status

ssh.service - OpenBSD Secure Shell server

Loaded: loaded (/lib/systemd/system/ssh.service; enabled)

Active: active (running) since Fri 2016-12-02 18:42:05 CET; 10s ago

Main PID: 13106 (sshd)

CGroup: /system.slice/ssh.service

2461 ssh-agent -s

--- 13106 /usr/sbin/sshd -D

—27517 sshd: skyline [priv]

—27519 sshd: skyline@pts/0

<u></u>27520 -zsh

—27561 sudo su

<del>----</del>27562 su

---27563 zsh

27589 systematl status sshd.service

\$>

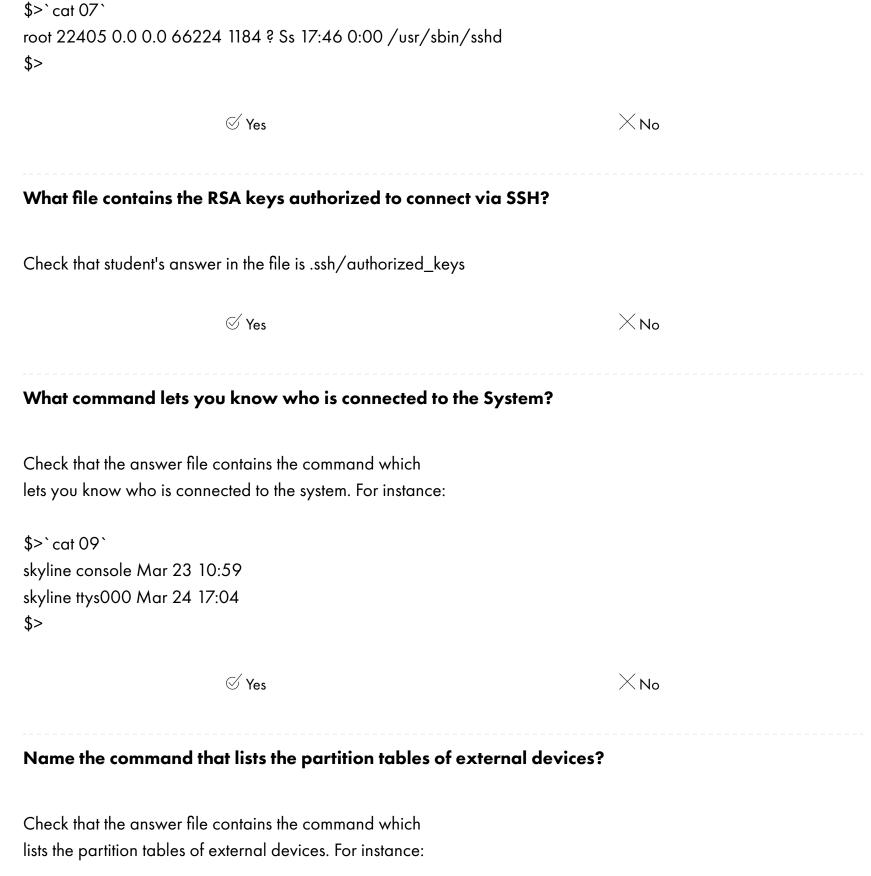

The displayed time in Active has to be in seconds because of the reboot of sshd.

✓ Yes

 $\times$ No

# Figure out the PID of the SSHD service

Check that the answer file contains the command which figure out the PID of the ssh service. For instance:

\$>`cat 10`

Disk /dev/sdb: 2000.4 GB, 2000398934016 bytes 255 heads, 63 sectors/track, 243201 cylinders Units = cylinders of 16065 \* 512 = 8225280 bytes Sector size (logical/physical): 512 bytes / 512 bytes I/O size (minimum/optimal): 512 bytes / 512 bytes

Disk identifier: 0x0000000

\$>

### Name the command that displays the available space left on the system?

Check that the answer file contains the command which displays the available space left. For instance:

\$>`cat 11`
Filesystem Size Used Avail Use% Mounted on /dev/xvda2 7.8G 1.2G 6.3G 16% /
udev 10M 0 10M 0% /dev
tmpfs 200M 4.2M 196M 3% /run
tmpfs 500M 0 500M 0% /dev/shm
tmpfs 5.0M 0 5.0M 0% /run/lock
tmpfs 500M 0 500M 0% /sys/fs/cgroup
\$>

## Figure out the exact size of each folder of /var

Check that the answer file contains the command which displays the exact size of each folders of /var.
For instance:

\$>`cat 12`
4.0K /var/opt
864K /var/spool
1.3M /var/log
111M /var/lib
124M /var/cache
4.0K /var/local
8.0K /var/mail
1.1M /var/backups
4.0K /var/tmp
238M /var
\$>

arnothing Yes imes No

# Name the command that find currently running processes

Check that the answer file contains the command which displays running processes in real time.

For instance: \$>`cat 13` Tasks: 58 total, 1 running, 57 sleeping, 0 stopped, 0 zombie %Cpu(s): 0.0 us, 0.0 sy, 0.0 ni, 100.0 id, 0.0 wa, 0.0 hi, 0.0 si, 0.0 st KiB Mem: 1022952 total, 359176 used, 663776 free, 168200 buffers KiB Swap: 0 total, 0 used, 0 free. 86924 cached Mem PID USER PR NI VIRT RES SHR S %CPU %MEM TIME+ COMMAND 1 root 20 0 28740 4760 3064 S 0.0 0.5 0:03.28 systemd 2 root 20 0 0 0 S 0.0 0.0 0:00.00 kthreadd 3 root 20 0 0 0 0 S 0.0 0.0 0:00.02 ksoftirgd/0 5 root 0 -20 0 0 0 S 0.0 0.0 0:00.00 kworker/0:0H \$> ✓ Yes  $\times$ No Run the `tail -f /var/log/syslog` command in background Check that the answer file contains the command which runs the command `tail -f /var/log/syslog` in background For instance:

\$>`cat 14`

[1] 2660

Mar 25 06:25:03 rsyslogd: [origin software="rsyslogd" swVersion="8.4.2" x-pid="330" xinfo="http://www.rsyslog.com"] rsyslogd was HUPed Mar 25 07:17:01 CRON[2601]: (root) CMD (cd / && run-parts --report /etc/cron.hourly) Mar 25 08:17:01 CRON[2656]: (root) CMD (cd / && run-parts --report /etc/cron.hourly) \$>

✓ Yes

 $\times$ No

## Find the command that kills the background command's process

Check that the answer file contains the command which kills the process of the tail -f /var/log/syslog command. For instance:

\$>`cat 15` [1]+ Terminated tail -f /var/log/syslog \$>

Find the service which makes it possible to run specific tasks foll	owing a regular schedule
Check that student's answer in the file is cron.	
✓ Yes	×No
Find the command which gives the list of firewall rules	
Check that the answer file contains the command which gives the list of firewall rules. For instance:	
\$>`cat 17` Chain INPUT (policy ACCEPT) target prot opt source destination	
Chain FORWARD (policy ACCEPT) target prot opt source destination	
Chain OUTPUT (policy ACCEPT) target prot opt source destination \$>	
	×No
With the previous command, authorize only IP addresses from	10.0.0.0/8 to connect to your system
Check that the answer file contains the command which authorize only IP addresses from 10.0.0.0/8 to connect to your system. For instance:	
<pre>\$&gt;`cat 18` \$&gt; \$ptables -L Chain INPUT (policy ACCEPT) target prot opt source destination</pre>	

✓ Yes

ACCEPT all -- 10.0.0.0/8 anywhere

Chain FORWARD (policy ACCEPT)

 $\times_{\mathsf{No}}$ 

target prot opt source destination Chain OUTPUT (policy ACCEPT) target prot opt source destination \$>  $\times$ No ✓ Yes With the previous command, forbid all others Check that the answer file contains the command which forbids all others to connect to your system. For instance: \$>`cat 19` \$> \$> iptables -L Chain INPUT (policy DROP) target prot opt source destination ACCEPT all -- 10.0.0.0/8 anywhere Chain FORWARD (policy ACCEPT) target prot opt source destination Chain OUTPUT (policy ACCEPT) target prot opt source destination \$> ✓ Yes  $\times$ No

# Part 3 - Scripting

Evalution of the part 3 - Scripting

Write a script which displays only the login, UID and Path of each entry of the /etc/passwd file

Check that the script displays only the login, UID and Path of each entry of the /etc/passwd file. For instance:

root:0:/bin/bash daemon: 1:/usr/sbin/nologin bin:2:/usr/sbin/nologin sys:3:/usr/sbin/nologin sync:4:/bin/sync games:5:/usr/sbin/nologin man:6:/usr/sbin/nologin lp:7:/usr/sbin/nologin mail:8:/usr/sbin/nologin news:9:/usr/sbin/nologin uucp: 10:/usr/sbin/nologin proxy: 13:/usr/sbin/nologin www-data:33:/usr/sbin/nologin backup:34:/usr/sbin/nologin list:38:/usr/sbin/nologin irc:39:/usr/sbin/nologin gnats:41:/usr/sbin/nologin nobody:65534:/usr/sbin/nologin systemd-timesync: 100:/bin/false systemd-network: 101:/bin/false systemd-resolve: 102:/bin/false systemd-bus-proxy: 103:/bin/false sshd: 104:/usr/sbin/nologin Debian-exim: 105:/bin/false postfix: 106:/bin/false skyline: 1000:/bin/bash

\$>

✓ Yes
 ✓ No.

Write a script which updates all the package sources, then all pachages and then logs everything in a file named /var/log/update\_script.log. Create a scheduled task for this script, once per week at 4 AM.

Check that the script updates all the package sources and logs everything in the good file and check if it is cron. For instance:

\$>sh script/2
\$>cat /var/log/update\_script.log
